Office Action Summary

Art Unit: 1617

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-12, 15-26, 52, 53 are rejected under 35 U.S.C. 102(a) as being anticipated by Stockemann et al., DE 4344463A1 ('463) (see IDS of Feb. 09, 2000).

Claims 1-12, 15-26 is not novel over the prior art ('463). See page 2, lines 61 to 68, page 3, lines 42 to 44, page 4, lines 1 to 19, page 5, lines 1 to 10, page 6, examples 1 to 3, claims 1, 3, 5, 6, 8, 9, 11 and 12.

Applicants argue that DE '463 does not teach amenorrhea. However, such is an intended use. Applicants' disclosed dosages for the antagonists (page 9 line lines 20-24) and the gestagens (page 10 lines 23-31) <sup>mean</sup> overlap those disclosed in DE '463 (page 4 lines 33-37) and page 5 lines 9-11 respectively. As to the claimed phases, these also are intended uses. DE '463 (examples 1-3, page 6) teaches numbers of dosage units for antagonist and Gestagen that overlap the claimed numbers. In fact, example 1 page 6 in DE '463 is identical to applicants' Diagram 1 on page 14.

As to the now claimed amenhorrea, such must <sup>b</sup> be attained in view of the fact that, as discussed above, the ~~again~~ <sup>again</sup> disclosed dosages overlap and the phases (see DE '463 example 1 page 6 and applicants' diagram 1 page 14) are the same. <sup>again</sup>

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 1617

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12, 15-26, 29-32, 48, 51-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stockemann et al., DE 4344463A1 (DE '463) (see IDS of Feb. 09, 2000).

DE '463 is discussed above.

It would have been obvious to use a combination of competitive progesterone antagonist and gestagen as a contraceptive in view of DE '463.

As to the claimed kits, such are well known in the art.

That is, one of ordinary skill, even the layman, is cognizant of the convenience of contraceptive compositions provided in the kit form and the fact such kits are commercially available. Thus, it would be an obvious expedient to make the invention of DE '463 in kit form, including delineating pills in sets of 7 to indicate one week periods of time.

Applicants again argue the intended use of amenorrhea. Applicants also argue that there is no teaching of a kit in DE '463, however, applicants are silent <sup>re</sup> ~~reg~~ regarding the well-known existence of such kits cited above.

No claims allowed.
